

FLAT TILE HOOK KIT

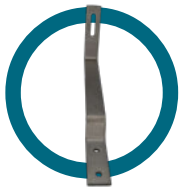

Specifically designed for flat tiled roofs, the flat tile hook provides a secure and discreet mounting solution perfectly suited to this type of roofing configuration.

The Flat Tile Hook is specifically engineered to meet the installation requirements of roofs covered with flat tiles, commonly found in regions with strong architectural or heritage traditions. Its slim and elongated design allows for installation without cutting or deforming the tiles, ensuring the preservation of both the aesthetic and functional integrity of the roof.

With its low-profile shape and tailored geometry, it fits easily under the tiles and provides a stable attachment point for mounting rails without adding bulk or placing undue stress on the tiles. This hook enables quick and precise installation while maintaining excellent mechanical resistance against wind and snow loads.

The Flat Tile Hook is an ideal solution for photovoltaic integration projects on historic buildings, renovations, or roofs with high architectural value, where discreet mounting and respect for the original roofing material are essential.

KIT

Flat Tile Hook

Wood screw

T-Slot Hammer nut

DIMENSIONS

PART NAME	DIMENSIONS
Flat Tile Hook (1pc)	286x167mm
Wood Screw (2pcs)	Length 80mm
T Slot Hammer Nut (1pc)	Head of T bolt 23x10x4mm Bolt size: M8x25

TECHNICAL INFORMATION

Material : Stainless Steel AISI 304 for Hook and T-Slot

Color : Raw
